1. All pending claims 10-17 are allowed. Claim 10 is independent.

2. The following is an examiner's statement of reasons for allowance:

Claims 10-17 were indicated allowed in the previous Office Action dated July 14, 2005. Claims 1 and 5-9 have been canceled to place the application in condition for allowance.

Reasons for allowance for claims 10-17 given in the previous Office Action are still valid after the updated search. The reasons are repeated below.

Claim 10 and its dependent claims 11-17 are allowable over the prior art of record because none of the prior art teaches an image sensor unit having a combination of the claimed pair of illumination sections disposed to sandwich the lens, the claimed light guides of the pair of illumination sections having exit ports formed such that a peak of exit light is farther than a focal position of the lens for the image sensing element with respect to the image sensing element, the focal position being included in a beam crossing region of exit beams from the pair of illumination sections, and a frame integrally holding the pair of illumination sections, the lens, and the image sensing element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2627

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Shishido (U.S. Patent No. 6,892,945) discloses a contact image sensor unit (108) having a pair of light guides sandwiching a lens.

Matsuda (U.S. Patent No. 4,728,995) discloses a device for adjusting exposure amount.

Ebisawa et al. (U.S. Patent No. 6,816,624) discloses an apparatus for scanning a book (Fig. 9).
